

Wiki Extensions for SharePoint 2016

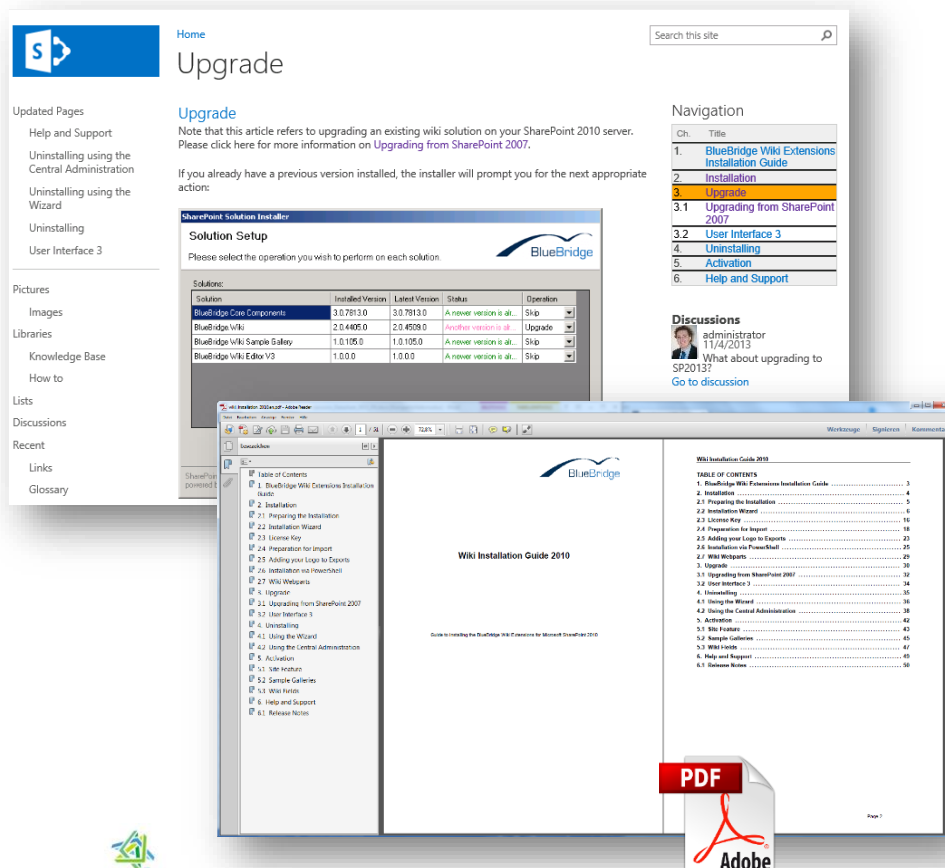

Company-wide Wikis - the way they were always supposed to be

It comes as no surprise that wikis have become one of the central features in SharePoint and more and more organisations are now using wikis to communicate effectively. The BlueBridge Wiki Extensions build on this basis, opening up new possibilities in the realm of teamwork, as well as simplifying the process of knowledge transfer.

Functionality

PDF Export	Word Import	Navigation Webpart	Re-Use Text Snippets
Table of Contents	Discuss/comment on individual articles	Syntax Highlighting	Lifecycle Management

The Wiki Extensions in Action

The screenshot displays a SharePoint Wiki page titled 'Upgrade'. The page content includes an introduction to upgrading an existing wiki solution on a SharePoint 2010 server, a 'SharePoint Solution Installer' dialog box with a table of solutions, and a 'Wiki Installation Guide 2010' PDF document. The table in the installer dialog is as follows:

Solution	Installed Version	Latest Version	Status	Operation
BlueBridge Core Components	3.0.7913.0	3.0.7913.0	A newer version is avail.	Skip
BlueBridge Wiki	2.0.4005.0	2.0.4508.0	A newer version is avail.	Upgrade
BlueBridge Wiki Sample Gallery	1.0.105.0	1.0.105.0	A newer version is avail.	Skip
BlueBridge Wiki Editor V3	1.0.0.0	1.0.0.0	A newer version is avail.	Skip

The PDF document, titled 'Wiki Installation Guide 2010', contains a table of contents with the following items:

- 1. BlueBridge Wiki Extensions Installation Guide
- 2. Installation
- 2.1 Preparing the Installation
- 2.2 Installation Wizard
- 2.3 License Key
- 2.4 Preparing for Import
- 2.5 Adding your Logo to Content
- 2.6. Installing via PowerShell
- 2.7 Wiki Webparts
- 2.8. Upgrading
- 3.1. Upgrading from SharePoint 2007
- 3.2 User Interface 3
- 3.3. Activation
- 3.4. Site History
- 3.5. Sample Galleries
- 3.6. Wiki Pages
- 3.7. Help and Support
- 4.1. Release Notes

Compatibility and Languages

- SharePoint 2016: Foundation & Server
- The Wiki Extensions are built around standard SharePoint technologies so there is no need to install a separate wiki server or use custom templates or content types
- Installs on all language versions; interface is in English or German

Return on Investment

- Users can keep informed of important topics through self-study
- Increased motivation and lower levels of frustration arise thanks to the ease of use
- Higher levels of motivation encourage users to really *live and breathe* SharePoint and use it for other applications as well

Examples of Use

Documentation	Training plans	FAQs	Knowledge Base
Meeting Minutes	Event Planning	Project Co-ordination	Specifications

Project Expertise

Here are some typical projects that we have implemented for our wiki customers:

- Complex workflows including custom notifications
- Multi-language so that viewers can switch article language with a single click
- Corporate Design and custom navigation
- Import from MediaWiki and other sources such as XML

About BlueBridge

BlueBridge Technologies AG has been working with Microsoft SharePoint since before the launch of the first version in Germany. We offer a range of services to help you turn your SharePoint system into what it should be – an effective, user-friendly and well accepted business platform.
